

Observed Failure	Reason
test_find_user_fails_if_user_does_not_exist	Asserted if find_user returned None on no user found, instead of asserting if threw error on no user found
test_find_user_succeeds_if_user_exists	Called wrong find_user arguments, throwing an error in test
test_delete_existing_user_succeeds	Chose wrong decisions argument when inserting (in - not in)
test_set_available_users_succeeds	Asserted wrong user list length; applied file with 2 users, checked for a length of 4.
test_refund_succeeds	Bad test code from wrong fuction call by trying to add multiple users to a list using list.append() at once.
test_advertise_item_succeeds	Bad test code from wrong Advertise transaciton initialization. Added User instead of Item.
test_advertise_item_from_deleted_user_fails	Bad transaction code, code never checks for if seller actually exists.
test_bid_only_highest_bid_accepted	Check for highest bidder didn't work
test_bid_invalid_winning_bid_fails	Bad bid code. Allowed insufficient fund bids.
test_create_existing_user_fails	Bad create code. Never added error raise for already created user.
